**701 Whaley Wedding Venue – Project Progression**

**701 Whaley – This is the before.** “A little history on the Pool: it was built around 1918 and, after closing as a pool (we are not sure of the date of closing), it was most recently used as a sort of dump for the engine repair shop in the adjacent building.” 701 Whaley FB Page

## 701 Whaley – The property 100 years later.

- Photo shoot of the interior glass panels. Because of the installation challenges of trying to match a pool wall that was made early in the 20<sup>th</sup> century, it was wisely decided to install the interior panels then take laser measurements for the perimeter panels.

- Perimeter panels presented several challenges. First dimensionally it has to match irregular pool walls. The owner wanted a tight fit, so debris could not fall into the old pool. Thus, we had to offset the lamination layers to meet the owner's requirements.
